magnetic margins. a census and annotations database

<https://doi.org/10.48431/res/qk19-bj96/magmar/>

*created by christoph sander, hassan el hajj, alessandro
adamou*

the project “magnetic margins” investigates how and by whom the most important book publications on magnetism were read and annotated.

this database provides a census of major publications in this field of study and maps annotations in the individual copies of these editions.

for further information, please navigate to the resource and see documentation there.
