tags and vocabulary used in image metadata and classification

an attempt to explain and define the use of these concepts

for images in this database, a controlled vocabulary was used in order to standardize all tags appearing in the metadata. tagging will always lead to disputable and vague decisions, as the complexity of the subjects tagged not always makes it easy to decide if a specific tag applies or not. to tackle this inherent quandary it will be laid out what was the rationale behind this vocabulary.

this vocabulary is hierarchical in nature. in most cases, parent tags were given if one or more child tags were given. e.g. if the tag 'compass' (child) applies, also the tag 'instrument' (parent) applies. this avoids tags such as 'other' and makes the set searchable to a higher degree. tags that only function as parent tag but are not assigned anywhere are put in square brackets.

the main distinction between all tags is whether they describe the content or the graphical elements and the medium of the image. content tags describe what is represented by the image while element tags describe its appearance and visual elements while medium tags entail information about its production.

all images are tagged against the thematic background of this project on magnetism and its (limited) corpus. other material deserves another vocabulary. quasi-universal vocabularies such as iconclass will not allow to ask the research questions that are underpinning this historical research

text

explanation

[relating to the semantic content of the image]

content representing or dealing with the physical magnetic phenomena in

general, including geomagnetic phenomena

representations of magnetic poles (of piece of magnet and earth)

representations of the spatial extension of magnetic force

representations of attractive and repulsive forces related to magnetism

representations of magnets or needles aligning in north-south direction

representations of magnets or needles deviating from north-south direction

('magnetic declination')

representations of magnets or needles inclining below or above the horizon

('magnetic dip')

content representing or dealing with theoretical concepts not directly connected

to the physical force of magnetism

representations of music, harmony, and tones

representations of taxonomy and classification in the realm of mineralogy

content representing or dealing with any attempt or idea of explaining magnetic

phenomena

causal concepts relating to physical particles, atoms, corpuscles

causal concepts relating to astrological influences, astral rays, etc.

causal concepts relating to hylemorphism or other formal principles

content representing or dealing with the material use of magnets or magnetic

force

representations of instruments to detect or measure magnetic force

representations of magnetic compasses and/or their use

representations of magnetic compasses included in other instruments, such as

sundials or theodolites

representations of machines or gadgets making use of magnetic force

representations of a specific piece of magnet

content representing or dealing with practices

content related to or representing experiments related to magnetic phenomena

content related to or representing mathematical calculations or poofs

content representing or dealing with allegorical or symbolic interpretations of

magnetism

allegories/symbols originating from a pagan context

allegories/symbols originating from a Christian context

[relating to the textual and graphical elements in the image]

the image contains textual elements

rara magnetica

https://ch-sander.github.io/raramagnetica/

tags and their explanation

physical objects

topographical structures

body

tag | explanation

letters the textual elements contain single letters

numbers the textual elements contain numbers

symbols the textual elements contain symbols excluding letters and numbers (e.g.

astrological symbols or mathematical notations)

words the textual elements contain words

phrases the textual elements contain phrases of more than one word

sentences the textual elements contain full grammatical sentences

abstract elements the image contains abstract visual elements

geometrical forms abstract elements include geometrical forms, such as circles, lines, rectangles

arrows abstract elements include arrows (both symbolic and material, such as compass

needles)

musical notation abstract elements include musical notation

tabular shapes abstract elements include tables or its visual components, such as rows and

columns

taxonomic shapes abstract elements include taxonomic features, such as tree-diagram structures

concrete elements the image contains concrete visual elements, such as physical objects or persons

concrete elements include physical objects

persons or parts of human concrete elements include natural or mythological persons, or non-personal

depictions of human bodies or parts thereof

scene concrete elements are arranged as a scene, depicting an event, situation, or place

concrete elements include structures to encode topological information such as

maps

plasticity the image uses visual effects to create the impression of plasticity and volume

light/shadow visual effects include light and shadow (e.g. 'chiaroscuro')

3d and perspective visual effects include the use of perspectivity and/or show objects as

three-dimensional

paratext the image has a paratext situating it in the context of the book

caption the paratext is a caption for the image

creator signature the image contains information about its creator, such as artist signatures

[relating to the medium of the image]

[position] [relating to the layout position of the image]

integrated in the layout the image is part of the mise-en-page

part of a set the image is part of a group of images appearing close to each other on the same

page

in the margin the image is placed in the margin of the page, i.e. next to the text

drawing

painting

explanation

the image is or is part of the title page or frontispiece

the image appears on a seperate sheet of different dimension as the pages surrounding it or added in the back or at a different place of the work

the image appears on a seperate page without text outside the image excluding paratext(s)

the image has material parts or features that make it interactive

the image is a volvelle consisting of material parts

the image is meant to be cut out and used by the reader

[relating to the technique(s) to create of the image]

the image is produced as woodcut print

the image is produced as engraving (e.g. 'intaglio print')

the image is a drawing made by hand the image is a painting made by hand
